

I am appalled that this country would allow such a flagrant abuse of power and corruption of our media by allowing Sinclair Broadcasting to force their stations to air a partisan anti-Kerry "documentary" just days before the election. This is a prime example of the danger of media consolidation and why we need to strengthen our media ownership rules. There should be clear consequences for Sinclair's FCC license renewal.

They are allowed to use the public airwaves free of charge and are obligated by law to serve the public interest. When they abuse their position of power this way, the FCC must be able to hold them accountable. Please do what you can to stop this flagrant abuse of a major broadcasting company from trying to control our democratic process. Thank you.
